

DNA TESTING:

HOW TO IDENTIFY RELATIVES & ANCESTORS
USING AUTOSOMAL DNA RESULTS

Saturday, March 3

(Snow date: Sat., March 10)

10:30a.m.—Noon

Farioly Program Room

Participants will become familiar with using DNA testing for expanding their genealogical research. This is a workshop which will help researchers understand and use the most common DNA testing. Researchers can use their data to discover and prove relationships. The program will also show users the three main testing companies and discuss ways to store and analyze DNA data.

Presenter: Nora Galvin is a professional genealogist who specializes in Irish and Connecticut research and Genetic Genealogy. She is a former science teacher and laboratory scientist. She is active in the Connecticut Ancestry Society and the editor of their quarterly journal.
